About Manaseer Fertilizers & Chemicals

Our Factory

MANASEER Fertilizers & Chemicals has designed and constructed a fully-automated NPK powder fertilizer production line and liquid/suspension NPK fertilizer production line, which both use high quality technology. In addition to the new production line of specialty micro-granule fertilizers.

Product Range

Specifications of the Products

1. Solubility: The usage of technical grade raw materials with water soluble anti-caking results in having highly soluble fertilizers.
2. Free Flowing: The anti-caking properties of our fertilizers results in the advantage of a free flowing product when stored according to international standards.
3. Colors: Customers can freely choose the color tracer of their final product.
4. Mixing: As a fully-automated production line is used, well mixed products are the final results.
5. High / Low pH Fertilizers: Depending on the climate of the customer's country or the area where the fertilizer will be applied, pH can be manipulated accordingly.
6. Chelated Trace Elements: Added trace elements enhance the soil's uptake of fertilizers which stimulates plant growth.
7. Additives: Amino acids, Molybdenum and other additives can be added upon the customer's request and needs.
8. Compatibility: Many pesticides can be mixed with MANASEER Fertilizers & Chemicals fertilizers and applied in one application to save time and therefore money. However, small testing must be done before mixing to ensure compatibility.

Formulas

MANASEER Fertilizers & Chemicals products are tailor made upon customer's specifications. The customer can request a product with different nitrogen sources, pH at different levels, with or without chlorine and trace elements, various e. c. values, etc.

Usage

MANASEER Fertilizers & Chemicals products can be used for all kinds of plants at different growth stages. Our products can be applied to plants in green and glass houses as well as outdoor crop fields.

Applications

MANASEER Fertilizers & Chemicals products can be utilized in all kinds of irrigation systems such as:
drip irrigation
injection
spray

Powder Fertilizers

1. Popular NPK powder fertilizers
2. Foliar NPK powder fertilizers
3. Urea Free NPK powder fertilizers
4. Acidic NPK powder fertilizers
5. High-Nitrate NPK powder fertilizers
6. Specialty NPK powder fertilizers
