Your partner in feed solutions

# Champrix

Protein Concentrates	Premixes	
Prestarter Complete Feed	Acidifiers	
Toxin Binders	Milk Replacers	Other Specialties

We do more than supply feed and feed ingredients. We are result-oriented and we will make sure we provide you with high-quality feed solutions. The feed solutions can be customized in any way that fits your needs.

We give you the best possible advice and services regarding all matters relating to animal nutrition, farm management, feed production as well as registration and transportation. We are dedicated to giving professional advice and share our knowledge with the aim of optimising the performance.

We are experts in exports. We are experienced in shipping our products all over the world. With the international ports of Rotterdam and Antwerp nearby, we have cost-efficient global distribution capabilities. If desired, we can even compose a shipping of more than one product in one container.

# WHO WE ARE

**Champrix is a Netherlands-based company that delivers tailor-made concentrates, premixes, prestarter feed, milk replacers and feed additives. We offer besides feed solutions also services for our distributors, feed millers, integrations, and farmers to improve their results.**

We work in an efficient management structure with short lines which enables us to go through great lengths to find the best suitable solution for you. We have a result-oriented mindset, and we guarantee high-quality and sustainable premixes, protein concentrates, prestarter feed, milk replacers and feed additives entirely adapted to your needs and requests to improve the animal performance. We work hard to make your life easier, more efficient, and more profitable, every day. Due to our positive, hands-on, common sense and customer friendly attitude, we are able to establish strong and long-lasting partnerships.

Champrix is a reliable and quality-focused provider in the animal feed industry, offering not only feed solutions but also valuable services to support your success.

# CONCENTRATES

## Champrix Protein Concentrates

**Champrix concentrates are suitable for all different kinds of farm animals and available in all inclusion rates from 2.5% up to 35% of the complete feed. Champrix concentrates are practical in application and made from the highest quality raw materials available, including amino acids, antioxidants, anti-moulds and/or production/efficiency improving feed additives.**

- Available in all inclusion rates (2.5% - 35%).
- Concentrates for all different kinds of farm animal species.
- Tailor made or according to a Champrix program.
- Available including amino acids, growth promoters, enzymes, coccidiostats, etc.
- Increased quality of complete feed with ensurance of homogeneity of micro-ingredients in final feed.
- Easy to mix!

We offer our own concentrates as well as tailor-made solutions.

GMP+ certified  
Store in a dry, cool and dark place.

## Our own proven Poultry Concentrates:

**Layer Concentrates** are balanced mixture of proteins, energy, amino acids, vitamins, minerals and other feed additives which is essential to support optimum egg production.

- Layer Concentrate 20%
- Layer Concentrate 5%

**Broiler Concentrates** are a balanced mixture of proteins, energy, amino acids, vitamins, minerals and other additives which is essential to support healthy growth.

- Broiler Concentrate 35%
- Broiler Concentrate 10%

### **Adjustable**

*Tell us the ingredients and facilities you have available and we will optimize our premium concentrate for your needs.*

# PREMIXES

## Champrix Premixes

**Champrix vitamin and mineral premixes are suitable for all different kinds of animals and available in all inclusion rates from 0.01% up to 2.5% of the complete feed. Premixes are the answer for completing your complete feed ration with the best ratio of essential vitamins and minerals. Investment in the right premix for your animals diets will pay off in better productivity, less mortality and improved farm performance and thereby higher return on investment!**

- Available in all inclusion rates (0.01% - 2.5%).
- Premixes for all farm animal species.
- Tailor made or according to a Champrix program.
- Available including amino acids, growth promoters, enzymes, coccidiostats, etc.
- Contains all the necessary and balanced amounts of vitamins and minerals.
- Ensure homogeneity of vitamins and minerals in complete feed.

We offer our own premixes as well as tailor-made solutions.

GMP+ certified  
Store in a dry, cool and dark place.

### Champrix Broiler Premix

Balanced vitamins and minerals for broilers.

- Support growth and lower FCR.
- Supports strong bones.
- Improve carcass and meat quality.
- Improves health.

### Champrix Layer Premix

Balanced vitamins and minerals for layers.

- Prevents deficiency diseases.
- Improves growth and reduces mortality.
- Increase egg ratio.
- Egg weights become more balanced.
- Improve eggshell quality and reduce dirty eggshell problems.
- Better FCR.
- Improves immunesystem.

# PRESTARTER COMPLETE FEED

## Prestarter Complete Feed

**An excellent start is essential for the lifetime production of the animal. Prestarter feed stimulates feed intake from the first hours onwards, prepares for future growth, improves in the support of the immune system and decreases mortality.**

- Excellent digestible proteins.
- Balanced vitamin D3, available phosphorus and calcium.
- High quality vitamins and minerals.
- Easy to consume and digest.
- Supporting the development of the immune system.
- Stimulation of beneficial microflora.
- Decreases mortality.

**NaPo** – Chick prestarter complete feed

**NoVo** – Pig creep feed for the best start

GMP+ certified  
Store in a dry, cool and dark place.

# ACIDIFIERS

## Champ-Acid Range

Acidifiers are added to animal feed to reduce the pH of the gut environment. They inhibit or partially restrict the growth and development of the common pathogenic microbes present in the intestine. Acidifiers added can be in the form of organic and inorganic acids or their associated salts. In fact organic acids have also been known to promote the health and performance of the poultry birds.

**Champ-Acid Standard, Plus, Advanced and Liquid** are the acidifiers to improve feed efficiency and control pathogenic pressure for a more healthy gut flora, efficient nutrient utilization by the animal, and absence of digestion disorders.

GMP+ certified  
Store in a dry, cool and dark place.

# TOXIN BINDERS

## Champ-Tox Range

**Our solution for management of mycotoxins**

**Mycotoxins are a serious challenge for farmers globally. Mycotoxins are unpredictable and hard to control. Use toxin binders to protect your animals against the negative effects of mycotoxins.**

Mould and yeast spoilage of feed and mycotoxins have a direct negative influence on the health and production performance of animals. Champrix offers the following mycotoxin binders: **Champ-Tox Standard, Plus, Advanced and Premium** for different degrees of mould and yeast infection.

GMP+ certified  
Store in a dry, cool and dark place.

# MILK REPLACERS

## Champlac

**Healthy animal rearing in the first months of life has a considerable impact on growth, weaning age and ultimate production. The supply of a high quality milk replacer to rearing animals is therefore key and needs precise management.**

- Champlac is based on 100% vegetable fats and produced according to the spray-dried production system. The spray-dried production system makes the fat's particle size very small, which assures an outstanding emulsion and digestibility.
- Combination of fat composition and encapsulated fat technology to improve digestibility and solubility.
- Decreased risk of diarrhoea.
- High in lactose delivered by high quality whey sources.
- Extra Vitamin A, D3 and E for skeleton growth and good health.
- Optional inclusion of probiotics stimulating beneficial bacteria, improved immunity, decreased diarrhoea and increased performance!

**Champlac Calf Milk Replacers, Lamb Milk Replacers and Sow Milk Replacers are your solution to a sustainable production life and increased revenue!**

GMP+ certified  
Store in a dry, cool and dark place.

# OTHER SPECIALTIES

## Vitaprix

Watersoluble vitamins.

- Easy utilization through the drinking water.
- Easy soluble in both water and milk replacers and therefore it increases absorption by the animal.
- Helps preventing diseases.
- Faster recovery of farm animals after a period of stress.
- Prevention of dehydration from diarrhea through macro minerals.
- In case of low feed intake by the animal due to heat stress or other factors, amino acids, such as lysine and methionine are still provided.

## Champ-Green

High quality mixture of essential oils. A unique combination of carefully chosen bio-active fat components and essential herbal oils ensuring optimal feed intake and support to the animal throughout the entire gastrointestinal tract.

- Antibacterial and fungicidal properties.
- Broad antimicrobial effect.
- Protection of living cells.
- Aromatic and appetizing.
- Improved gut morphology.
- Improved animal-specific enzyme production.
- Improved nutrient digestibility and stimulated feed intake.
- Improved animal performance, lower mortality and less antibiotics needed!

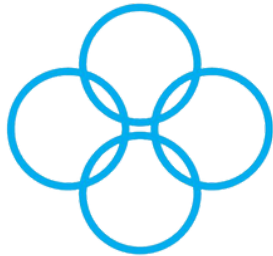

## Heat-Champ

In order to reduce heat stress, specific vitamins are added. Moreover, it is well known that the availability of vitamins in poultry feeds depends greatly on ambient temperatures. Heat-Champ contains all critical vitamins and therefore fortifies your diet and helps avoiding nutritional deficiencies.

- Improved feed intake.
- Improved feed efficiency.
- Reduced feed costs.
- Lower mortality.
- Increased resistance against heat.
- A better technical performance.

GMP+ certified

Store in a dry, cool and dark place.
